Three Reasons for Collocation
1. Collaboration Model with Asia-Pacific Regional Communities to Nurture Theme-Based Researches

- APSCE & ICCE (Nov/Dec)

- Six Theme-Based Sub-Conferences
  - AIED/ITS/ADL
  - CSCL/LS
  - ALT/OS/S
  - CUMTEL
  - GTEL&S

Two important emerging theme-based research in Asia-Pacific region
2. They are high quality, so they are not big, so they can be collocated.
3. They are related!

Ubiquitous Game-Based Learning may be a dominating research trend in the future!
How about 2014?

We expect WMUTE2014 & DIGITEL2014 to be held in the Asia-Pacific region too
How about the odd years?

- Odd year events of WMUTE & DIGITEL are open to strong proposals from Europe or America.

- They can be collocated events (like WMUTE2010/DIGITEL2010) or separated events, i.e., different locations and different dates.
